

Gunina* Partners Inc.

Finding Value > Inflicting Change > Turning Around Projects

*** What is Gunina?**

In ancient Asian mythology, Gunina is the One who is The Master of all Virtues.

"The problems we face today cannot be solved by the minds that created them" - Albert Einstein

Are you struggling to find answers?

- Do you have projects that are not progressing?
- Has your economic development stalled?
- You don't know what sector to focus on?
- You have completed "studies" and are thinking now what?
- You are not getting market participants to join your vision?
- Are you looking for Action on the ground?

Who are we? What is special about us?

The market place today is plagued with projects that reach a dead end. Conducting "studies" and producing "reports" has become an industry, embedded with consultants who have no stake in the future. What we need now is progress and action and we need it now!

Gunina specializes in taking on initiatives that were going nowhere and brings about positive change. The way we do it is by taking direct and forceful action that delivers value. We attack the problems head-on, provide clear thinking ability and are not afraid of criticism from stakeholders. Creating value is our only business. In short, we take the "bull by the horns". We do not develop reports and studies on *how* to execute change. Instead, we are fond of short and to-the-point Action Plans that get things going in the right direction.

We walk the talk!

Our mission is simple - to deliver guaranteed economic value i.e. we get paid when we deliver results. We take a low monthly retainer and tie our future to success of the project (via equity or via success fee). Marrying Gunina's future with our clients', we believe, is the true essence of a successful partnership.

What are the roles we take on?

Our roles vary with the need. For example, we lead projects as **project managers**, **implement strategies** for growth and sustainability, provide **executive leadership** or act as **business support team** for the executive leadership. Our sector focus area includes Energy and Natural Resources, Education and Capacity Building.

What are our Skills?

We recognize that to bring about change, a tripod of Business, Technical and HR/Culture skills are required – and that is exactly what we provide. Gunina is lead by **Rahul Lakhote**; we also bring in our specialists on an as needed basis.

Our offering to the Remote Communities & First Nations:

We believe that we have the right ingredients of skills and positive attitude to act as Management Support team for the Band leadership and for the executive team of remote communities. We can help develop and implement projects and new business ventures. As we are in it for the long-haul and our victory is tied to our clients', success is guaranteed!
